Full-Stack Web Developer

College graduate with a bachelor's degree in English, and more recently completed UCLA Extension Coding Bootcamp. Leveraging a background in hospitality to coalesce and build a more intuitive user experience on the web. Known for abilities to problem solve, meet deadlines, and be a successful team player.

Team-Based Projects:

Iphy Weather: Focused on the use of API resources. Primary focused on back-end development to create a web application that provides the user with weather information based on location. Added user's ability to search weather conditions by *zipcode* or *city&state*. Successfully completed the project working with a team of 4 members in 12 days.

Five Star Foodies: Implemented MVC design pattern to build a restaurant search engine utilizing YelpAPI. Worked with another team member to incorporate secure user authentication through Auth0 alongside React.js and Node.js.
